

Single Source Solution Provider for all your Technical Requirements

Stealth Network Services Inc. has been providing infrastructure solutions to our customers since 1996. We are a single source IT Partner that specializes in network service, support, installation and integration.

Your network infrastructure is critical to your business, and when it breaks it costs you time and money. This is where we can help, SNS works together with you to identify the best technologies to fit your goals and budget. We then ensure that those technologies continue to work well into the future.

SNS also offers a Network Management Solution for small to medium businesses that provides proactive 24/7 remote network monitoring to eliminate problems before they occur. This program gives you the piece of mind that your technology investments are well maintained and supported.

SNS is your single source IT Partner, working with you to understand what technology makes sense for your business. Some of the solutions we provide include:

- NETWORK DESIGN
- SUPPORT AND INTEGRATION
- PROACTIVE NETWORK MANAGEMENT
- ROUTER AND FIREWALL CONFIGURATION
- HARDWARE AND SOFTWARE SALES
- REMOTE ACCESS SOLUTIONS
- REMOTE ADMINISTRATION
