

# When network downtime is not an option!

## What would happen to:

- **Your productivity:** if your network, connecting your PCs, printers and copiers no longer worked?
- **Your business:** if you couldn't communicate via email to customers or if your financial or ordering systems were not available?
- **Your reputation:** if you missed delivery dates or mis-shipped due to network downtime?
- **Your bottom line:** if your employees couldn't be productive or your reputation was compromised?

From competing for profitable contracts to maximizing technical resources, your network is critical in driving your business' success. Your network needs to be:

- Efficient
- Precise
- Responsive
- Flexible

## When network downtime is not an option:

Stealth Network Services will eliminate up to 80% of those emergency service calls for the same price or less than what you are currently paying!

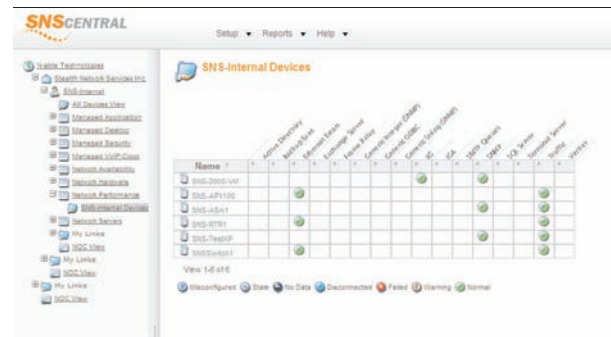

Figure 1 Multiple customer and location Views displayed on one central Web console.

Proper service delivery can almost eliminate emergency service calls and the downtime and lack of productivity associated to your current reactive model.

## Your network is Mission Critical!
